SUMMARY

Senior Product Engineer with 7+ years of experience building and shipping user-facing products end-to-end. I specialize in turning complex technical systems into intuitive, reliable experiences by combining strong engineering with product thinking and UX sensibility. Shipped production systems supporting \$100M+ in managed assets and thousands of active users, with ownership spanning product design, architecture, implementation, and post-launch iteration. Daily user of AI and agentic development tools to prototype, test, and deliver products faster. EU citizen working fully remote across time zones, available for international contract engagements through a US-based LLC.

EXPERIENCE

Product Engineer - VeChain

Mar 2025 - Jan 2026

- Owned the design and delivery of Stargate, a production platform supporting **\$100M+ in managed assets** and thousands of active users.
- Worked closely with stakeholders to turn complex technical constraints into intuitive workflows that users could complete in just a few interactions.
- Built and scaled Restify, a mobile application that grew to **16K+ users**, **500K+ verified transactions**, and **140M seconds of engagement** within 8 months.
- Contributed across frontend, backend integrations, and data indexing, taking end-to-end ownership from architecture to production launch and iteration.

Lead Product Engineer - Blockzero Labs

Jan 2022 - Dec 2024

- Led the development of multiple production products, including Flashstake and Epoch Island, from initial concept to launch and ongoing iteration.
- Built and shipped Flashstake, a financial application that secured **\$20M+ in managed assets** and reached **\$40M+ in peak asset participation**.
- Translated product ideas into scalable systems, balancing user experience, technical complexity, and time-to-market.
- Owned architecture decisions and coordinated delivery across frontend, backend, and smart contract layers.

- Worked directly with founders to refine requirements, prioritize features, and iterate based on product feedback and adoption.

Project Lead - Walletvote

Sep 2021 - Apr 2022

- Co-founded and led development of a decentralized social network enabling censorship-resistant product information sharing
- Led a team of 7, owning Solidity smart contracts and frontend architecture

Full-Stack Developer - Artur.ai

Apr 2021 - Sept 2021

- Developed and improved a centralized wealth management platform aggregating fiat, crypto, art, and real estate assets
- Built an asset aggregation dashboard enabling users to track diversified portfolios across multiple asset classes
- Designed and implemented an advanced KYC and onboarding system, balancing regulatory compliance, UX constraints, and security requirements
- Delivered production-ready features in a regulated environment, collaborating closely with product and compliance stakeholders
- Supported early-stage platform scaling and user onboarding during initial growth phase

Project Manager - French Ministry of Defense

Jan 2021 - Mar 2021

- Led full-stack redevelopment of a technical documentation portal for the French Navy
- Modernized legacy systems to improve operational efficiency and maintainability

Full-Stack Intern - Healint Pte. Ltd.

Apr 2020 - Sept 2020

- Built and shipped production Vue.js modules for B2B healthcare platforms
- Delivered patient-doctor interaction and treatment support features

Project Lead - MedecinAI

Sep 2019 - Apr 2020

- Led a team of 8 to build an AI-powered medical imaging platform for brain tumor detection
- Won Grand Prize at Efrei Paris Innovation Day for technical excellence and real-world impact

Frontend Intern - SAP

Jun 2019 - Jul 2019

- Designed and built a medical risk assessment web application using the MERN stack

- Focused on scalability and usability for clinical end users

PRODUCT ENGINEERING STACK

Product Engineering: TypeScript, React, Vue, Next.js, React Native, Node.js, PostgreSQL, SQL, Python

Infrastructure & Tooling: AWS, Docker, Git, Vercel

Additional Experience: Go, GraphQL, Django, MongoDB

Blockchain: Hardhat, Ethers.js, Viem, The Graph

EDUCATION

Efrei Paris

2017-2022

Master's degree in Computer Science (Software Engineering, Blockchain Development),
Innovation Day Grand Prize for MedecinAI (AI-powered brain tumor detection platform)

Manipal Institute of Technology

2019

Computer Science Exchange
