SUMMARY

Senior full-stack engineer with 7+ years of experience building scalable, user-facing web applications across financial and data-driven products. Shipped and maintained production systems supporting \$100M+ in managed assets and thousands of active users. Specialized in frontend architecture integrated with complex backend logic, delivering secure transaction flows, dashboards, and core product features with end-to-end ownership across system design, implementation, and production UX focused on reliability and scale. Extensive experience using AI and LLM-based tools to accelerate prototyping, testing, and development workflows. EU citizen working fully remote across time zones, available for international contract engagements through a US-based LLC.

EXPERIENCE

Full-Stack Engineer - VeChain

Mar 2025 - Jan 2026

- Built and maintained **Stargate**, a production-critical financial platform managing digital asset locking and validator participation workflows
- Designed and implemented digital asset participation tooling and validator tooling supporting **6,000+ NFT holders** and **\$100M+ in managed assets**
- Built **Restify**, a mobile Web3 application on **VeBetterDAO** using React Native and NestJS, enabling users to earn rewards for verified off-screen activity
- Scaled Restify to **16K+ unique wallets**, **500K+ verified transaction executions**, and **140M seconds of verified sessions** within 8 months

Lead Full-Stack Engineer - Blockzero Labs

Jan 2022 - Dec 2024

- Led development of production Web3 applications, including **Flashstake** and **Epoch Island**
- Built and shipped **Flashstake**, a fixed-yield DeFi staking application enabling upfront rewards for time-locked liquidity
- Implemented and maintained smart contract interactions for staking and yield distribution, securing **\$20M+ in TVL**

- Developed user-facing systems integrated with on-chain state, supporting high-value transactions
- Flashstake reached **\$40M+ token market cap** at peak usage
- Owned architecture decisions and production delivery across multiple launches

Project Lead - Walletvote

Sep 2021 - Apr 2022

- Co-founded and led development of a decentralized social network enabling censorship-resistant product information sharing
- Led a team of 7, owning Solidity smart contracts and frontend architecture

Full-Stack Developer - Artur.ai

Apr 2021 - Sept 2021

- Developed and improved a centralized wealth management platform aggregating fiat, crypto, art, and real estate assets
- Built an asset aggregation dashboard enabling users to track diversified portfolios across multiple asset classes
- Designed and implemented an advanced KYC and onboarding system, balancing regulatory compliance, UX constraints, and security requirements
- Delivered production-ready features in a regulated environment, collaborating closely with product and compliance stakeholders
- Supported early-stage platform scaling and user onboarding during initial growth phase

Project Manager - French Ministry of Defense

Jan 2021 - Mar 2021

- Led full-stack redevelopment of a technical documentation portal for the French Navy
- Modernized legacy systems to improve operational efficiency and maintainability

Full-Stack Intern - Healint Pte. Ltd.

Apr 2020 - Sept 2020

- Built and shipped production Vue.js modules for B2B healthcare platforms
- Delivered patient-doctor interaction and treatment support features

Project Lead - MedecinAI

Sep 2019 - Apr 2020

- Led a team of 8 to build an AI-powered medical imaging platform for brain tumor detection
- Won Grand Prize at Efrei Paris Innovation Day for technical excellence and real-world impact

Frontend Intern - SAP

Jun 2019 - Jul 2019

- Designed and built a medical risk assessment web application using the MERN stack
- Focused on scalability and usability for clinical end users

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, SQL, Python

Frontend: React, Next.js, Vite, React Native, Vue, TailwindCSS

Backend & APIs: Node.js, Go, Express.js, GraphQL, Django

Cloud & Tooling: AWS, Docker, MongoDB, Vercel, Git

Blockchain: Hardhat, Ethers.js, Viem, The Graph

EDUCATION

Efrei Paris

2017-2022

Master's degree in Computer Science (Software Engineering, Blockchain Development),
Innovation Day Grand Prize for MedecinAI (AI-powered brain tumor detection platform)

Manipal Institute of Technology

2019

Computer Science Exchange
